

### Technical specifications

Woofer	Diameter 6 1/2" (165mm)
Cone	Polyglass
Basket	ABS
Voice-coil	1" (25mm)
Magnet	3 1/3" (85mm)
Sensitivity	92.7dB
Re	2.6 Ohms
Kit bandwidth	70Hz - 25kHz
Max. power	140W
RMS power	70W
Integrated crossover	6/18dB/oct (4kHz)
Tweeter	Aluminum/Magnesium inverted dome TNB
Tweeter mounting	Molded for perfect integration in the original location and respect of the dashboard design.

Integration IFP 207 PEUGEOT 207 DEDICATED KIT

instant gratification

# IFP 207: first dedicated FOCAL kit

Launched in 2010, the new FOCAL program was built around three lines made to meet different needs: Elite, Performance and Integration. The Integration line meets the following demands: "Accessibility, Easy installation, Pleasure". In the last few years, the update of an audiophile system has become more and more complex (ergonomic loss of on-board computer control functions, remote screens, porting circuit into MOST technology, reduction of depth space for speakers...). However, our research has revealed continuing interest in audiophile sound quality, whatever the vehicle type or the driver's age.

## How could we introduce an innovative, simple, efficient and perceptible method of delivering the best of sound?

Our R&D engineers have studied the question and have found a solution: the first dedicated kit of the Integration line: the IFP 207 kit. This kit is made of 2-way component speakers (a pair of woofers and a pair of tweeters) dedicated, designed and made for one vehicle. A philosophy built on enjoyment respect and accessibility to extraordinary quality! This "plug and play" concept was made with regard to the original locations and the design created by the car manufacturer not only on the mechanic plan, but also on the acoustic plan (sound rendering improvement, taking into account the volumes and the inherent car interior restraints). After long months of studies, research, tests,

validations and listening sessions, the IFP 207 is born at last and now stands in a new market that's totally oriented towards pleasure and simplicity. This first "ready to play" kit joins a promising program aimed at specific vehicles sold worldwide. Without unveiling what will be the complete range of future Integration line dedicated kits, we can simply mention the most complete projects so far, such as the dedicated kits for Volkswagen Golf, BMW 1 and 3 series, Japanese cars...

IFP 207: 2-way component kit, user manual, video and specific tools for mounting. Compatible tweeter mounting, integrable and with harmonious design.

# Plug & Play, 100 % made in France!

## Easy installation

By guaranteeing installation in less than an hour, keeping the original head unit, the IFP 207 brings a solution to all the Peugeot 207 owners who wish to discover the best of the audiophile sound. All the tools are supplied and a video shows the different steps of the installation. It couldn't be easier!

## Compatibility

This 2-way component kit can be installed at the front instead of the original speakers of the Peugeot 207 3/5 doors CC/SW. This IFP 207 kit is also compatible with the Peugeot 307\* and Peugeot 308 (in 3/5 doors CC/SW versions).

*\* Important note: the speaker fixing in the Peugeot 307 is made inside the door trim. Acoustic insulation (such as FOCAL BAM) should be added to improve the result.*

## Listening

The woofer is the result of a long study on the efficiency/frequency compromise and offers intense but subtle bass reproduction. The aluminum inverted-dome tweeter, hallmark of the brand, provides neutral treble reproduction, which is accurate and reliable up to the highest frequencies.

Working on the tweeter formers produced an aesthetic match with the dashboard. Above all, thanks to its orientation and specific binding, the tweeter development greatly improved the original sound image (height, depth and width of soundstage). The result is a pure enveloping sound with great neutrality. Enjoy!

Installation 100% dedicated to Peugeot 207 in less than an hour. Watch the demonstration video: <http://www.focal.com/fr/ifp207-video-install>

Because we make internationally recognized acoustic loudspeakers and because our R&D department innovates to supply our production workshops, we are proud to introduce the IFP 207, the first kit of the Integration line dedicated to the Peugeot 207 car. Experiment in your vehicle the acoustic enjoyment you can have in your living-room...
