Between acoustic excellence and new trends...

With 35 years of experience in the design and manufacture of speaker drivers and hi-fi loudspeakers, Focal has also been displaying its expertise in new ways to listen to music in recent years. This is the DNA of the New Media Collection: while its design and miniaturization are different from the usual form of our traditional loudspeakers, the heart of the product, the authenticity of the sound, the quest for excellence, are exactly the same.

Focal has always focused all its attention on the reproduction of a textured and rich sound. Our unique know-how, our many patented technological innovations, the use of specific materials: all of these components are symbols of the attention we pay down to the smallest details. Details that enable us to better manage all of the factors that influence sound quality. Controlling the mass, rigidity and damping provides our cones with strong acceleration and low distortion. The result is dynamic real and natural sound that is unique to Focal, and a major asset in terms of responding to the demands of audiophiles and other music lovers.

At the same time, the music world has undergone many changes in recent years. Access to music is easier than ever with files going digital. The trend towards miniaturization has opened the door to new players, the “plug & play” solutions are buzzing all around, sources are many and wireless, and TVs are becoming sources in their own right. In short, uses evolve and music is everywhere, at the flick of a switch.

In this context, Focal decided to integrate these new ways of listening into its range, including miniaturization of speakers, but without compromising the quality of the music, which forms a core part of our values. This challenge required the expertise of our enthusiastic engineers and gave rise to the New Media Collection: multimedia wireless speakers, mini Home Cinema systems and satellites, subwoofers or even headphones all have the characteristic of a tailor-made design and with great ease of use and integration.

The New Media Focal are products adapted to new uses, to which we applied the formulas that have made our classic ranges a success to bring out real hi-fi products and to remain true to our values while satisfying our customers of today and tomorrow.

Dimension, The Real TV Sound

Building on 35 years of expertise when it comes to the expectations of music and home-cinema fans in terms of sound, Focal infuses its acoustic know-how into a new sound object: the soundbar Dimension.

We were very quick to notice that most soundbars try to seduce consumers by combining a compact design with adequate sound power, even if it means forsaking clarity and neutrality of dialogues. Easy to install and use, innovative and distinctive by its acoustic design, Dimension goes further and provides flat screens with real power, excellent audio quality and a perfect integration.

A key innovation is the five patented high-bandwidth and ultra-thin speakers, offering a very low frequency response and featuring a central inverted dome which radiates the treble. It results in a very shallow depth of 65mm and a remarkable coherence across the audio spectrum, regardless of listening position.

Supporting Dolby Digital and DTS encoding, Dimension provides perfectly intelligible and natural-sounding dialogues whilst adding a subtle contrast with the picture. In terms of power, its 450W max, perfect for rooms even measuring over 50m², will satisfy lovers of great shows.

Supporting Dolby Digital and DTS

Featuring an intuitive and discreet touch interface, Dimension only requires setting up once, in a few minutes, and benefits from the CEC command to control your system with a single remote.

Supporting Dolby Digital and DTS encoding, Dimension provides perfectly intelligible and natural-sounding dialogues whilst adding a subtle contrast with the picture. In terms of power, its 450W max, perfect for rooms even measuring over 50m², will satisfy lovers of great shows.

Concerned about the perfect integration of Dimension when not choosing the on-wall installation, Focal imagined a support, which is perfectly adapted to associate simply the screen and the soundbar on furniture. Dimension and Dimension Sub, its optional subwoofer, then become one making a true sound plate for your TV.

Thanks to its subwoofer with which it associates easily, Dimension benefits from the addition of a sixth channel for a true 5.1 experience.

Dimension Sub is made with solid MDF and has been reinforced and topped with an elegant black glass plaque. It features in fact two extremely flat speaker drivers working in push-push configuration to avoid any vibrations, which may be damaging to the screen.

Those preferring to mount Focal’s soundbar to a wall can combine Dimension with a wireless subwoofer such as Focal Sub Air.

Easya, wireless high-fidelity sound

Easya is Focal’s “Made in France” new innovation which straddles the Classic and New Media Collections. This new generation of wireless amplified loudspeakers combines the ease of use of modern loudspeakers with the same remarkable sound quality as our traditional loudspeakers.

This loudspeaker system is composed of a Hub and two amplified floor-standing loudspeakers. Two-and-a-half-way bass-reflex loudspeakers, built-in 85W RMS amplifier, Polyglass cone speaker drivers, new TNV2 Aluminium/Magnesium inverted dome tweeters with Poron suspension...

Easya embodies all the traits of a 100% Focal, high-fidelity loudspeaker providing a seamless soundstage with admirable spatialisation, an essential quality to ensure your listening pleasure.

The installation and use of Easya correspond perfectly with the new uses of music: everything is directly built into the loudspeaker, so external amplifiers or cables are no longer required. The wireless Hub is a digital transmitter sending sound signals to the loudspeakers, and thanks to Kleer® technology, there’s no loss in quality or compression.

What distinguishes Easya even more in Focal’s range of products is the strong identity of its design, setting it apart from the previous traditional ranges. Curved design, aluminium stand, built-in LED: created by the design firm Pineau & Le Porcher, Easya is a product with definite high-perceived value.

MADe IN FRANCE

Dôme is a high-end and high-tech compact loudspeaker made in France which is perfectly in line with current trends! Two models are available, each featuring a different Focal speaker driver technology originating from the brand’s most prestigious loudspeakers.

Dôme Polyglass, the original satellite loudspeaker of the range, ensures neutrality, excellent dynamics and a precise sound image thanks to the Polyglass cone speaker drivers. The more recent addition to the family, Dôme Flax, benefits from the innovative composite sandwich cone made with natural flax. It has already proved its worth with the high-fidelity Aria 900 loudspeakers and the Car Audio kits in the Performance range, and offers a distinct improvement in definition and better linearity in frequency response. Thanks to the spectacular capabilities of the speaker drivers in both these models, Dôme is predestined for rooms up to 430ft² (40m²).

As for the style, Dôme has a refined design. There are no visible screws, and the noble materials and luxury finish provide high perceived value. This speaker is multi-directional and can be fitted to a wall, the ceiling or a stand with ease.

Dôme, the sonic spotlight

Dôme Polyglass and Dôme Flax can both be accompanied by the subwoofer. Sub Air is a compact subwoofer, simple to set up. Providing intuitive and deep sound, Sub Air is free from any cables and has a flat, compact design, making it easy to integrate into any interior.

Available in Black or White finish.

**Dôme Specifications**

- **Dôme Polyglass**
  - Type: Ultra compact 2-way sealed speaker
  - Drivers: 4" (10cm) Polyglass Mid-bass, 1" (25mm) Al/Mg inverted dome tweeter
  - Frequency response (±3 dB): 80Hz - 28kHz
  - Nominal impedance: 8 Ohms
  - Amplifier power: 25 - 100W
  - Dimensions (H x W x D): 6 3/4x5 11/16x5 5/8" (172x144x143mm)
  - Net Weight: 4.2lbs (1.9kg)

- **Dôme Flax**
  - Type: Ultra compact 2-way sealed speaker
  - Drivers: 4" (10cm) Flax Mid-bass, 1" (25mm) Al/Mg inverted dome tweeter
  - Frequency response (±3 dB): 80Hz - 28kHz
  - Nominal impedance: 8 Ohms
  - Amplifier power: 25 - 100W
  - Dimensions (H x W x D): 6 3/4x5 11/16x5 5/8" (172x144x143mm)
  - Net Weight: 4.2lbs (1.9kg)

- **Dôme Sub**
  - Type: Active bass-reflex subwoofer
  - Drivers: 8" (21cm) Polyflex woofer
  - Frequency response (±3 dB): 42Hz - 200Hz
  - Nominal impedance: 8 Ohms
  - Amplifier power: BASH® 100 W amplifier

**Optional Accessories**

- **Floor stand for Dôme**
- **Wireless Sub Air subwoofer**
The Sib satellite speaker represents a first foray into the universe of high-fidelity sound and can now look back on an impressive longevity as an entry-level compact acoustic speaker.

Sib was designed to simplify daily life, for all types of music or video content. Thanks to its exceptionally practical design and the multiple ways it can be mounted – the speaker can be positioned on the floor, on furniture or on the wall around your screen – Sib is simplicity itself to install.

The Cub³ is an iconic subwoofer, intended entirely for use with Home Cinema systems. Designed to provide high-quality 5.1 sound, the Cub³ is a compact product that incorporates only those functions strictly necessary for the purpose. This makes it extremely simple to install and use, and there is no need to compromise on acoustic performance.

For optimal output, the Cub³ has a 21cm bass reflex woofer and modern 150 watt BASH® amplification, allowing it to reproduce every nuance of the bass register. Its “Soft Touch” matt finish means it will perfectly blend into your home.

Sib & Co, a new way to live and listen
The Home Cinema range is based on research done by Focal, which led to the creation of favourites such as Sib, Dôme and our latest invention, Bird. All of these are genuine high-fidelity speakers. They are furthermore designed to be able to be installed in any home setup. Whether wall- or ceiling-mounted or placed on an item of furniture, they will perfectly blend into your interior design, thanks to their sleek design and modern finish. The size and composition of these packs are all designed to reproduce the soundtracks to your favourite movies and are tailored precisely to your listening space, both in terms of dimensions and, needless to say, the desired volume.

In addition to our various satellite speakers, we also offer three subwoofers from which to choose, based on personal requirements. First, the Cub is an example of a classic Focal subwoofer. Second, the Sub Air offers increased freedom and ease of use thanks to its wireless connection. Finally, the Dôme subwoofer’s unique design and premium material and manufacturing add to its appeal.

The combination of these details means that Home Cinema packs from Focal guarantee faithful reproduction of the “Spirit of Sound” for the enjoyment of cinema and music at home.

As part of its constant drive to innovate and provide the very best in sound quality, Focal is launching 5.1 packs Home Cinema, which meet the expectations of even the most demanding cinema lovers! Visually appealing, compact and capable of being seamlessly installed in any decor, these customised packs provide a sound quality in keeping with the high-definition images of modern media, giving you an astonishingly powerful and high-quality sound experience in your own home. The packs are the product of Focal’s unique expertise in acoustics: each speaker has been meticulously designed and carefully tuned by our engineers. The speakers in the Home Cinema range were developed using the same principles as our most advanced products ensuring that they embody the Focal “Spirit of Sound”.

Visually appealing, compact and capable of being seamlessly installed in any decor, these customised packs provide a sound quality in keeping with the high-definition images of modern media, giving you an astonishingly powerful and high-quality sound experience in your own home. The packs are the product of Focal’s unique expertise in acoustics: each speaker has been meticulously designed and carefully tuned by our engineers. The combination of these details means that Home Cinema packs from Focal guarantee faithful reproduction of the “Spirit of Sound” for the enjoyment of cinema and music at home.

You no longer have to choose between sound quality and picture quality. According to your desire, these lightweight and compact systems can be mounted to the wall or integrated into your furniture. There’s no need to re-design your living space according to your sound system, the sound system needs to adapt to and discretely blend into your home, apart from when listening to the soundtrack of your favourite films! The Home Cinema systems will place you at the heart of the works of the seventh art.

Choose your configuration on www.focal.com
The XS Book Wireless has been designed for music lovers and to enhance the musical experience of the modern consumer. There’s nothing easier than enjoying your music from any portable device: simply connect your XS Book Wireless via Bluetooth® aptX®, play your favourite tracks and get the most out of your music. Thanks to the unique multifunction button, you can control the volume and turn your sound system on and off; it’s never been simpler.

The XS Book Wireless is in perfect harmony with Focal’s tradition of providing “true” sound. This compact loudspeaker offers impressive power, exceptional low-frequency response and excellent dynamics. The lightweight cone and the sophisticated vent (f-3dB: 60Hz) provide a real live sound, ensuring hours of listening pleasure and maximum liveliness. The XS Book Wireless is perfect for rooms up to 15m².

All the cables required are supplied with the XS Book Wireless: a 3.5mm jack for connecting to your computer, as well as an RCA cable (5ft/1.5m) and an extension cable (5ft/1.5m) for connecting the loudspeakers to each other.

Thanks to the optional carrying bag, you can take your XS Book Wireless with you wherever you go!

**XS Book Wireless**

- **Type**: 2-way bass-reflex active loudspeaker
- **Drivers**: Polyglass 4” (10cm) bass/midrange
  19mm Aluminum tweeter
- **Frequency response (±3 dB)**: 60Hz – 22kHz
- **Power**: 2x20 Watts RMS
- **Input**: RCA, 3.5mm
- **Dimensions (H x W x D)**: 11.14” x 4.13” x 7.79” (281x114x200mm)
- **Net Weight**: 11lbs (5kg)
- **Range**: 10m (without obstacle)
- **Codec**: aptX®
- **Resolution and Sampling Rate**: 16 bits - 44,1kHz
- **Algorithmic Delay**: <1.89ms @ Fs 48KHz

XS Book Wireless, freedom to enjoy your music
Focal XS 2.1 is an example of true Focal sound. It is a 2.1 high end multimedia solution with integrated USB soundcard and an iPod dock. Designed as a monitoring system, it has been developed on one hand for those who are looking for an experience beyond their existing systems and on the other hand, for the “ProAms” who want a control tool for music and video creations.

Its sober and modern design allows a perfect integration next to computer such as an Aluminum iMac®.

Focal XS is truly a compact, high-end system. It is composed of two satellite loudspeakers and a subwoofer, a high quality USB soundcard with converter (DAC) and an iPod dock for audio playback and charging.

Connected in USB to a Mac or to a PC, XS delivers sound which is at the same time powerful, balanced and defined to accurately reproduce music and sound from a computer. Its 3,5 analog jack adapter enables connection to any other audio sources. Thanks to its remote control (magnetic to fix it to the XS stand) you can change volume and access other iPod functions making XS 2.1 a really friendly addition.

---

**Focal XS 2.1, THE multimedia system**

- **Type:** 2-way shielded multimedia speaker
- **Active bass-reflex subwoofer**
- **Drivers:**
  - 3" (8cm) paper cone woofer
  - 3/4" (19mm) mylar dome tweeter
  - 6 1/2" (16.5cm) paper cone woofer
- **Frequency response (+/-3dB):**
  - 150Hz - 20kHz
  - 39Hz - 150Hz
- **Power:** 2x30W
- **Max. SPL:** 104dB SPL / 1m
- **Dimensions (HxWxD):** 125/8x39/16x57/8" (320x90x150mm)
- **Net Weight:** 1kg
Spirit One S is the fourth pair of headphones developed by Focal’s R&D team, and it takes full advantage of our latest advances in terms of headphone expertise. And in particular those achieved with Spirit Professional and Spirit Classic, both launched in late 2013 and praised by critics. Definition and rich mid-treble are here for the taking.

On the mechanical side, it was better to combine various criteria to achieve optimal comfort, lightness and robustness, key points for portable headphones to ensure listening pleasure without limits.

Spirit One S is perfect for all kinds of music, a real prerequisite for Focal. Definition and harmonic richness provide marvellous reproduction of music with refined acoustics. Great dynamics, vigorous bass and groovy rhythms are guaranteed with all kinds of vibrant music.

Spirit One S is destined for all those who are searching for more than just a stylish product, but also for real acoustic equipment... And at a very reasonable cost, as these are the most affordable headphones ever launched by Focal.

> Highly accessorised, Spirit One S is supplied with a detachable OFC cable compatible with all smartphones, a sturdy carrying case and a soft carrying bag, a 6.35mm jack and an airline adaptor.

Voluntary positioned in the high-end segment, both in terms of design and sound, offering an exceptional value for money on this market, Spirit Classic is harmoniously completing our headphones range.

Designed for a use at home, in a quiet background, they meet demanding customers’ expectations for who aestheticism, refinement and acoustic quality are essential in one product.

Spirit Classic is a closed headphones with premium materials and sophisticated finishes (solid, brushed and polished aluminium). The large circum-aural ear cups, the use of memory foam cushions and the large headband offer more comfort during long listening sessions.

Ear cushions perfectly fit with the head shape to ensure an excellent tightness without pressure. Bass performance is thus improved and outside disturbance reduced. Finally, Spirit Classic asserts itself thanks to its “Hot Chocolate” finish and its seams inspired by saddlery style.

The combination of Focal’s latest developments in headphones micro-acoustics as well as our legendary know-how in the design of high-performance transducers makes the Spirit Classic a true example of our “Spirit of Sound”, our sonic signature for a “live”, dynamic, powerful spirit, and a faithful reproduction of the music.

Supplied with 2 OFC audiophile quality cables (1m60 at 4m), 2 jack adapters (6,35 and 3,5mm), Spirit Classic can become nomad without difficulty when the audiophile who uses it at home wants to move with his/her music.

The Spirit Professional headphones are the direct result of Focal’s historical expertise in the design of high-performance transducers. In line with the Focal Professional monitor range, this monitoring solution will exceed the Studios, Broadcast environments as well as Home Studios’ expectations and needs.

Spirit Professional is an exceptional work tool, capable of ensuring high-quality control of monitoring activities. The close attention paid to the design of the Mylar/Titanium alloy speaker drivers ensures sound reproduction, which respects the original dynamics of the audio signal offering remarkably high definition and neutrality. Finally, the extremely precise reproduction of bass frequencies detects the slightest of imperfections in a mix freed from the acoustic constraints related to the size of their workstation.

In a studio environment, comfort is critical for a professional headphone that will be used for extended periods of time. The circum-aural closed design of the Spirit Professional headphones was chosen to optimise fitment around the ear and memory foam was used for the ear pieces and the headband to ensure a perfect fit regardless of user’s morphology.

The Black Textured finish gives the headphones a simplistic look and providing excellent shock and scratch-resistant qualities.
