ULTIMA is a full active car audio kit designed and inspired by all the best drivers used in our high-end loudspeakers. A real midbass developed from the "Grande Utopia EM" midrange associated with its tweeter with IAL2 technology to drive a 2-way front component kit. To be sure to have the best flat and neutral frequency response we associated two 8" subwoofers designed for our professional monitoring system SM9. With a high air decompression from the Power Flower woofer, the distortion is reduced to the minimum and offers high dynamic. Incredible materials and all the best Focal knowledge used on this kit are not the only highlights... more than a "product" it’s a real complete full active hi-fi system... handmade in France passionately for car and music lovers. From the low bass level to the very high frequencies, the listening pleasure is given by details, neutrality and high dynamic.
